Maze Master's Treasure Chart

		In these columns list % chance & quantity to be found in the categories indicated								
Tr#	Lair,	Copper	Silver	Electrum	Gold	Platinum	Gems	Jewelry		Mundane
	Indiv								Relics	

You Are the Maze Master! What Treasures are in your maze?

Down the left-hand side of your Treasure Chart, list out the Treasure Numbers, one for each category of valuables to be found in the depths of your maze. For each possible hoard, show if it is an individual treasure (carried by a single creature on foot) or if it is instead to be found in a creature's lair (where it is perhaps better guarded or hidden).

Each column to the right of this indicates a broad category of wealth that may be found. List a percentage chance that any given category is present, and do list the quantity, if applicable, as well.

Many more details for fleshing out your Treasure Chart can be found on the podcast. Consult the spoken tutorial during Chapter 69 for more details on completing your Maze Master's Treasure Chart.
